## VINCENT

CREATOR AND HOST OF THE "LE COUP TORDU" PODCAST

Digital Fantasy Cycling.

In 2021, I discovered Sorare and was immediately fascinated by the concept: buying football player NFTs, setting your line-up, and earning rewards based on their real-life performances. A thought instantly crossed my mind: this concept would be even more incredible if adapted to cycling. But at the time, I couldn't imagine for a second that such a project could actually become a reality.

In fact, I even dedicated a podcast episode to this idea, imagining what Digital Fantasy Gaming could look like in the world of cycling. That's when everything accelerated. Right after the episode aired, Valentin Gosse contacted me to say that such a project was already in the works and would soon see the light of day. A few weeks later, CyLimit was launched.

Since then, it has been a true adventure that exceeds all my expectations. CyLimit is much more than just a game: you become the manager of your own team, discovering riders you barely knew, following their progress, their stories, and celebrating them through their real-life achievements. It makes you experience cycling differently—more immersive, more exciting.

Today, CyLimit is already entering its fourth season, and one thing is certain: every promise has been kept. With every announcement, action has followed. Valentin and his team truly listen to the community, always receptive to feedback and critiques, allowing the game to constantly evolve. Nothing is swept under the rug; everything is done with transparency and passion.

And this is only the beginning. Gradually, new managers are joining the adventure, teams are growing stronger, and we are witnessing the construction of what could very well become the greatest success story in Digital Fantasy Cycling.

Join the adventure, because the time is now!

## PTIJUU007

2024 & 2025 MANAGER OF THE YEAR

The 2026 season will mark a turning point in the history of CyLimit in many ways.

From a gameplay and NFT perspective, we're seeing the arrival of an incredible "game changer." While we could already have a blast on CyLimit with a WT team, the newly named NSN Cycling Team, and other great squads featuring the stars of today and tomorrow, the arrival of Decathlon AG2R La Mondiale (CMA-CGM) hit the market and our collections like a bombshell!

Girmay, Askey, Küng, Mozzato, Lapeira, Prodhomme, Gall, Andresen, and Kooij are all fantastic new names, but the addition of Paul Seixas to the game is straight-up AMAZING!! Definitely top 20 in the world by 2026 at just 20 years old—and likely top 5 in the coming years—it's insane for the game's growth!

In three seasons, the game has constantly evolved and modernized, continually adapting to manager feedback. It's pro-level work... and this is only the beginning!

So, enjoy this exceptional guide to the fullest—it's a perfect reflection of the game—and come try to beat me in the side games on the excellent CyLimetrics: the FantasyCup and the Lefevere Challenge!

The more passionate fans we have, the greater the game will become.

Long live CyLimit!!

## RACE SELECTION: MAXIMIZE YOUR STRATEGY !

When building your team, assign each rider to the specific race where you want them to compete.

Each rider's score will depend on their real-life performance in that specific race.

Maximum flexibility :

- You can adjust your team as many times as needed until the start of your selected race.
- Even if other races within the same competition have already begun, you can still modify your riders as long as their own specific race has not yet started.

Stay reactive and optimize your choices to maximize your chances of victory !

## THE LEAGUES : DOMINATE THE COMPETITION !

In every competition, you can enter a team in any of the 8 available leagues, each with its own specific rules for card selection and scoring :

### LEAGUE 1

2 scoring types : Cap or Role

Cards : 3 to 5 Yellow cards + 0 to 2

White cards

### LEAGUE 2

2 scoring types : Cap or Role

Cards : 3 to 5 Pink cards + 0 to 2

White cards

### LEAGUE 3

2 scoring types : Cap or Role

Cards : 3 to 5 Blue cards + 0 to 2

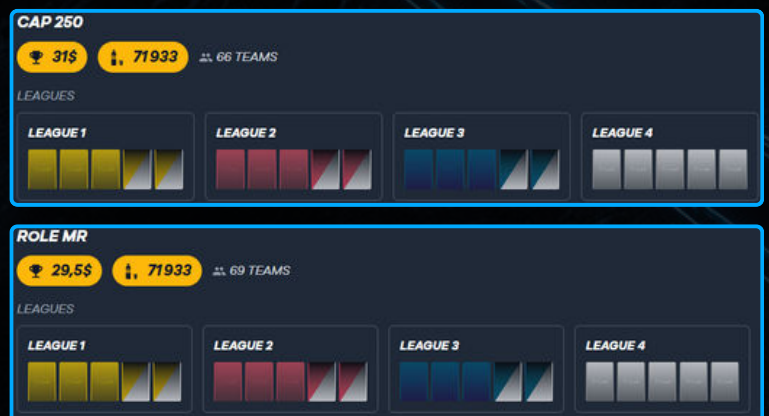

White cards

### LEAGUE 4

2 scoring types : Cap or Role

Cards : 5 white cards

That's a total of 8 competitions  
for every MR/MT !

# SCORING

CAP MODE

## RIDER SELECTION

Each card in your collection has a "Cap" value, which corresponds to the average of the rider's last 15 scores. In every competition, a Cap limit is set (usually 250 points).

The total Cap value of your 5 selected cards must not exceed this limit. This challenges you to balance your roster between star riders and promising outsiders.

**Strategy** : Find the best compromise between performance and Cap management to maximize your score.

## SCORING

All 5 selected cards follow the same scoring rules.

The main scoring criteria in this game mode are as follows :

15 PTS IF THE RIDER STARTS THE RACE  
15 PTS IF THE RIDER FINISHES THE RACE

**STAGE CLASSIFICATION**  
BREAKAWAY KILOMETERS  
BEST TEAMMATE RANKING

CAPTAIN BONUS (+25%)

## ROLE MODE

### RIDER SELECTION

There are no Cap restrictions here. Instead, each rider must be assigned to a specific role. The distribution of these roles and the quality of your strategy will be the keys to optimizing your score. Leverage each rider's strengths by assigning them the roles that best match their performance profile and the race's characteristics.

### SCORING

Each card's score is calculated based on its assigned role. The primary scoring criteria for this game mode are as follows :

#### MULTI RACE

4 THOMAS + GINO BROTHER	2674		\$1.08	359
5 GOUP	2377		\$1.08	353

## CLIMB THE RANKINGS

At the end of each race, scores are updated and your riders' cumulative performances are calculated. Once all the races in a competition are finished, your overall score is compared to that of other managers in your league.

Your final position in the ranking determines whether you win rewards.

## WIN EXCLUSIVE REWARDS

Rewards are set at the opening of each competition and vary based on several factors: race reputation, the number of races covered, the number of registered teams, the number of participating CyLimit riders, and market trends...

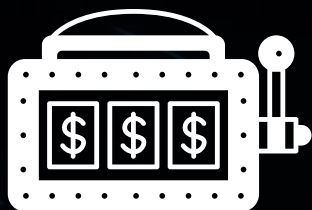

Rewards may include USDC earnings credited directly to your wallet, Bidons or White Bidons to expand your collection, XP points to freely assign to your cards, boosting their XP bonus, physical rewards, and more...

48 hours after the last race ends, the rankings are finalized, and rewards are distributed to the top managers in each league.

The higher your ranking, the greater the value of your reward (higher USDC amounts, more Bidons, or more XP points).

## LEAGUE 3 JACKPOT : AN EXTRA CHANCE TO WIN !

In addition to standard rewards, **Ligue 3 Cap** offers an additional opportunity to win a USDC jackpot, shared among the top-performing managers.

At the opening of each competition, a jackpot amount and a target score (usually set at 320 points) are announced. These values depend on several criteria: race reputation, number of races covered, number of registered teams, number of participating riders, market trends, etc.

At the end of the competition, all managers whose team reaches or exceeds the target score will receive an equal share of the jackpot!

## WHAT TO DO WITH MY XP POINTS ?

XP points allow you to improve your cards' scores in competitions. You can view your total available XP points on the "My Team" page.

**XP AVAILABLE**

**169471**

You can assign XP points as you see fit by visiting any card's page and clicking the "Boost XP" button.

**BOOST XP →**

Depending on the amount of XP assigned, your card will gain levels according to the chart provided.

+1 Level = +0.1% bonus to the competition score.  
 Level 100 (Max) = +10% bonus to the competition score.

# TIPS AND TRICKS

## MARKET STRATEGY

Before placing a bid, check if the rider is available on the secondary market and review recent sales to estimate their fair market value.

Before buying, verify the rider's contract length and check for any retirement announcements.

Riders who are no longer (or will soon not be) in CyLimit licensed teams tend to increase in value quickly, as no new cards will be minted for future seasons. Prices for young talents (U21) often skyrocket on the market.

Conversely, older riders, those currently injured, or those showing declining performance tend to lose value rapidly.

## SQUAD MANAGEMENT – GENERAL

Check the startlists the night before the race. Ensure they are finalized using reliable sources (CyLimit Discord, the  icon on PCS, or official First Cycling lists).

Wait until startlists are official before opening your race-specific White Packs (MR/MT) to avoid pulling DNS (Did Not Start) cards.

Monitor your riders' recent form (latest results, return from injury/break, recent crashes, etc.).

Evaluate the strength of the field (rivals' form, designated team leaders, etc.).

Analyze the terrain (High Mountains, Hilly, Flat, Cobbles) and pay close attention to the final kilometer (gradient, sharp turns, road furniture).

Look at previous years' results; they are often the best indicators of which riders excel on a specific course.

If in doubt, check bookmakers' odds to confirm your favorites.

Keep an eye on interviews and press articles regarding rider goals, team strategies, and official leadership roles.

If a race starts later than others in a competition, select a rider for that race and update your lineup the night before their start if necessary.

# SQUAD MANAGEMENT – ROLE MODE

**Leader** : select the rider expected to be the highest-ranked in their team and aim for the best possible GC (General Classification) result. Look for riders with stage-win potential or those likely to wear the leader's jersey during the race.

CLIMBER

**Grimpeur** : target riders competing for the KOM (King of the Mountains) jersey. Alternatively, pick riders likely to join breakaways with significant KOM point opportunities. Never select a climber for a race that does not feature a KOM classification.

SPRINTER

**Sprinteur** : aim for riders contesting the Points Classification, bunch or intermediate sprints. At the very least, look for breakaway specialists who can scoop up intermediate sprint points.

FREE ELECTRON

**Electron Libre** : identify "breakaway artists." Check the rider's historical data to see if they frequently attack the peloton. Look for "local heroes" (racing in their home region), riders on teams seeking publicity breakaways, or teams whose sponsors have major interests in the race's host country.

DOMESTIC

**Domestique** : choose a rider whose leader has a strong chance of a high GC finish, and who might also join breakaways or maintain a solid overall rank themselves. Warning: Avoid selecting a domestique who might end up as the highest-ranked rider on their team (penalty/malus). Sprint trains, lead-out men, and mountain lieutenants are often excellent choices here.

Follow official team and rider social media accounts for real-time updates and "inside" info.

Stay Informed : knowledge is power ! Listen to cycling podcasts, follow news & preview accounts, read the sports press, and consult specialized websites or bookmakers. Every bit of intel counts!
